

Architecture Sketch ITR1

Presentation Layer

- Includes the App.java class which contains the user interface, a list
gui
- Where the features are implemented together to form the functioning
application
 - Also includes the Login page class

Logic Layer

- Includes the component classes which are the
individual features based on the user stories
- E.g, Pomodoro.java,
DueDate.java, ScoreCounter.java, priority.java,
user.java, login.java
- Where the logic of the components are
implemented

Data access Layer

- For the first iteration, we are using a sub database using
hashmaps to store the user info.
- E.g. Login and user class info.
