

Problem report 1:

- Problem report number: 1
- Reported by: Ted Lee
- Date Reported: 03/24/2024
- Component name: Priority.java and ScoreCounter.java
- Commit version id: a56a61e
- Configuration(s): SW configuration
- Report type: Requirement issue
- Can reproduce: Yes
- Severity: high
- Priority: medium
- Problem summary: When logging back into a previously registered user with tasks made, the tasks and score are not saved onto the account.
- Keywords: User, Login, Tasks, Saving
- Problem description and how to reproduce:
 1. Register an account with username as "user" and password as "ted1234567" and login using those credentials.
 2. Input a task name "fail task" and enter a date e.g. 03/06/2025 and any level of priority then press "Add" to add it to the task list.
 3. Log out by exiting the application and reopen then log back in using the credentials registered in step 1.
 4. Verify that the tasks and score counter are not saved
- Suggested fix: Fix the connection between the priority and score counter classes with the database so that they are saved to each user.
- Status: Open
- Resolution: pending
